รายชื่อบทความในรายวิชาสัมมนาเกี่ยวกับวิชาสถิติ ปีการศึกษา 2564

ลำดับที่	รายชื่อบทความ
1	Method in the teaching of tennis coach
2	Selection of agility tests according to sports branches in terms of basic motor characteristics
3	The heuristic interpretation of box plots
4	Impacts of Temperature and Rainfall on Indian Food-grain crops using Multiple Regression analysis
5	The Data Analysis of Shanghai Air Quality Index Based on Linear Regression Analysis
6	Comparison of Two Sample Tests Using Both Relative Efficiency and Power of Test
7	Statistical Analysis of Strength of W/S Test of Normality Against Non-Normal Distribution Using Monte Carlo Simulation
8	Combining the t test and Wilcoxon's rank-sum test
9	An Improved Boxplot for Univariate Data
10	A New Modified Product Estimator for Estimation of Population Mean when Median of the Auxiliary Variable is known
11	Weighted Ratio-cum-Product Estimator for Finite Population Mean
12	Empirical Power Comparison of Goodness of Fit Tests for Normality in The Presence of Outliers
13	On Consistency and Limitation of paired t-test, Sign and Wilcoxon Sign Rank Test
14	The Chi-square test of independence
15	Kruskal-Wallis test as Analytical Tool for key Components of a Newly Developed Core Mixture
16	EWMA Control Chart Using Repetitive Sampling for Monitoring Blood Glucose Levels in Type-II Diabetes Patients
17	Application of CUSUM Control Chart for Monitoring the Trend of Hypertension in Nigeria: Anambra Scenario

18	Student perspective of classroom and distance learning during COVID-19 pandemic in the undergraduate dental study program Universitas Indonesia
19	Students' perception of online learning during the COVID-19 pandemic A survey study of Polish medical students
